

## Micro Climate Lesson Suggestions:

1. Write a one or two sentence definition of a micro climate.
2. In a few sentences describe variations in the sizes of micro climates.
3. Make a cause and effect chart which shows geographic causes of different types of micro climates and what the effect is. For example, proximity to a large body of warm water tends to keep contiguous land warmer.
4. Use the Internet to find and then list 5 places in the world where some large and famous micro climates exist. Include under each what Geographic factors seem to be the MAIN influence in creating that micro climate.
